

There's joy in watching some things grow.
Your gas bill isn't one of them.

SAVE UP TO 39%
WITH A DAIKIN SPLIT SYSTEM

THE ANSWER TO RISING GAS HEATING BILLS IS DAIKIN

Gas prices are growing year on year and experts are predicting they will continue to climb for more years to come. This is bad news when your gas heating amounts to approximately 69% of your gas bill.

Major changes in the gas market have increased the running cost of gas heating appliances for Australians. The amount Australian households pay for gas is heavily influenced by the higher prices gas exporters can obtain from other countries. As a result, Australian households are paying more for gas¹.

Now for the good news...

Households can make considerable **savings of up to 39%** on their heating running costs by switching to a Daikin split system.

DAIKIN SPLIT SYSTEMS ARE
UP TO 39% CHEAPER
 TO RUN THAN GAS HEATING

Our Research and Development team compared average running costs of a gas heating system versus a Daikin split system. This comparison was based on delivering identical heating running times from both options and then calculating the running costs.

GAS HEATER

UNIT SPECS

5 Star Room Space Heater

CALCULATIONS

- Output of Gas Heater = 6 kW (21.6 MJ)
- Output over 1516 hours = 32,745.6 MJ
- Gas consumption over 1516 hours = 38,524 MJ
- Gas cost = 2.350c MJ
- Additional electricity costs (i.e. fan and control electronics) = \$26.56
- Total gas cost = \$905.32

TOTAL COST OF GAS HEATING = \$931.88

VS

DAIKIN SPLIT SYSTEM

UNIT SPECS

Alira FTXM50U / RXM50U

CALCULATIONS

- Output of Air Conditioner = 6 kW
- Output over 1516 hours = 9,096 kWh
- Electricity consumption over 1516 hours = 1,970.8 kWh
- Electricity cost = 29.2c kW/h
- Additional energy costs = \$0
- Total electricity cost = \$575.40

TOTAL COST OF ELECTRIC HEATING = \$575.40

**39%
SAVING**

What's more... you'll enjoy all these other benefits with a Daikin.

BETTER AIR QUALITY

A Sensitive Choice approved product by the National Asthma Council Australia.

INTELLIGENT EYE

A human presence sensor can either direct airflow towards you or away from you for draft-free comfort, or if the room is unoccupied for 20 minutes, the unit automatically goes into energy saving mode.

COMFORT MODE

Guarantees draught-free operation by positioning the louvre downwards to drive warm air to the bottom of the room.

POWERFUL MODE

You need to heat the room quickly, powerful mode maximises the power for 20 minutes, before automatically returning the unit to the original setting.

SMART PHONE CONTROL (OPTIONAL)

Allows you to monitor and control your system from virtually anywhere.

Hours of heating based on the COLD climate band on Zoned Energy Rating Label (<https://www.energyrating.gov.au/labelling>). Heating hours is an estimation of equivalent rated capacity hours from methods within AS/NZS3823.4.2:2014(+A1). Electricity and gas tariffs based on Australian Energy Regulator 'State of energy market - Data update November 2019' reports. Energy conversion, 1 kW = 3.6 MJ. Gas consumption based on High Efficiency 5 Star Room Space Heater (85% conversion efficiency of gas to heat). Gas heater electricity consumption = 0.06 kW/h.

Some great HEATING OPTIONS FOR WINTER

US7

The first split system in Australia with a 7-star 'Super Efficiency' rating.*

ZENA

Stylish, elegant and engineered with the latest technology. Also available in Black Wood finish.

ALIRA

Blending in harmoniously with modern decors and delivering whisper quiet comfort at industry leading energy efficiency.

NEXURA

A modern floor-standing design that blends in seamlessly with your home's décor.

*2.5kW model only
